

David Dominguez

## Portfolio

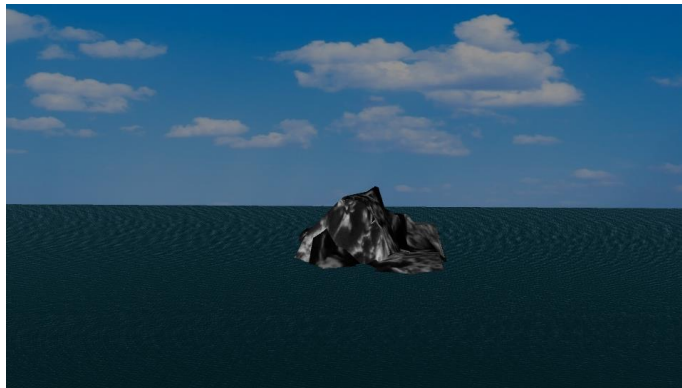

My name's David Dominguez and I am involved in so many things this year so far, but one other thing I'm surely glad to be in, is another year of Mr. Broome's class.

### 1. Maya Modeling

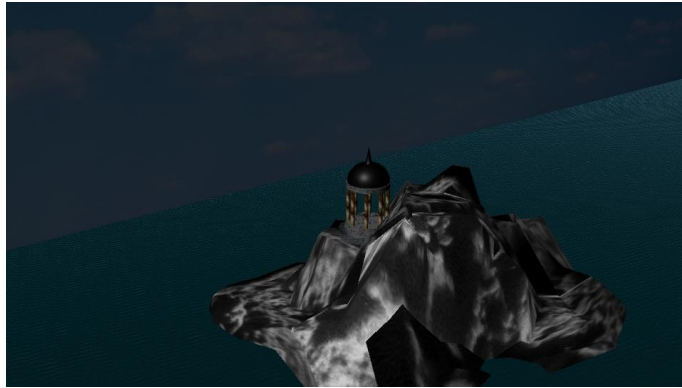

I (using Maya), made this model of a temple for my first project in this class. I have used polygon primitives and textures to create this first project using Maya.

### 2. Environment One

Here is another part of my first project for which the temple (in the previous picture) takes place in for the animation.

### 3. Maya Composition

This is my composition, which consist of many different **elements**, in average to fictional land and graphic sculpting thanks to Maya's software.

### 4. Maya character

I made my character just as different as everyone else's characters, though basically the same, but with different colors and textures.

## 5. Character One

<https://youtu.be/SpY9IeBmyxQ>

I used Maya's animation menu to give my character movement on the timeline and premiere to render it. After setting up the character, I had put key frames using Maya code. Then I had set up export settings.

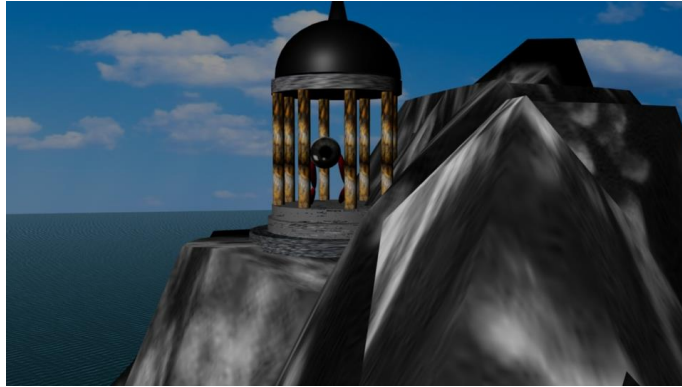

## 6. Magix Music Studio

<https://youtu.be/uvBKnRfd3WI>

I used Magix to start making music for my animations and other projects.

## 7. In Environment One

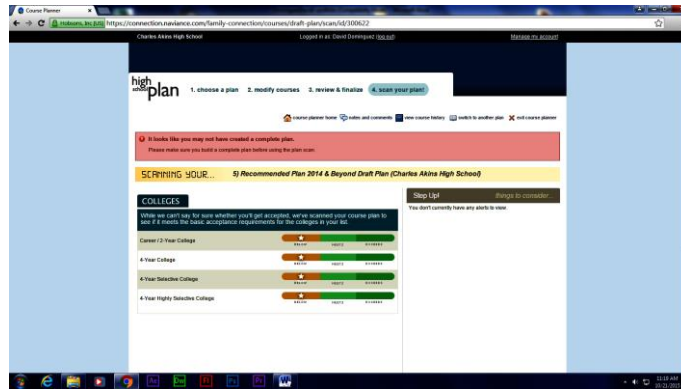

In this image, I made my animated character knock down a pillar as it rolled down hill, and made him walk up hill after he looks down and reacts scared to heights.

## 8. MudBox Human

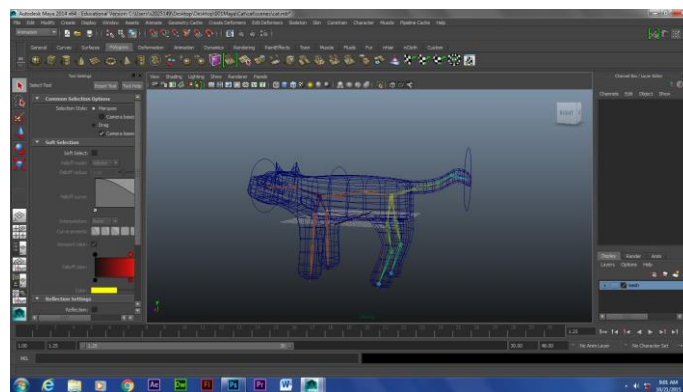

I made this image of a man with a Mohawk for experience in Mudbox

## 9. Naviance

I while on the AustinISD's website made this page come up with my schedule plan for this year.

## 10. Cat Model and Rigging

I made this 3D image of a cat in Maya as part of an animation I will be making soon.

### 11. Cat Still Walk

I made this 30 frames GIF practicing on a four legged creature.

### 12. Cat Walk Video

[https://youtu.be/htS1\\_ql--ik](https://youtu.be/htS1_ql--ik)

I created this short animation of a walking cat.

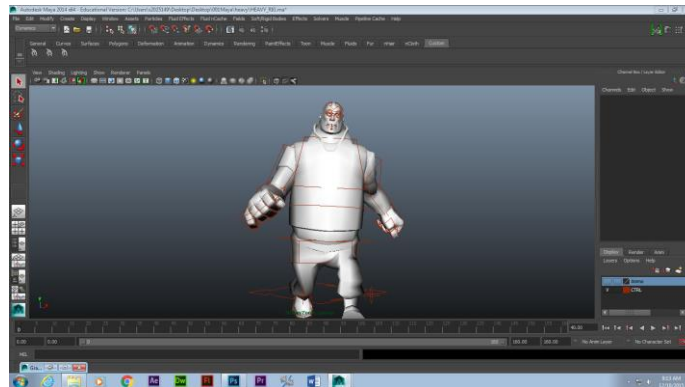

### 13. Cat Story

<https://youtu.be/NxslN9ULC4>

I made this animation of a cat, hissing at ball rolling towards him.

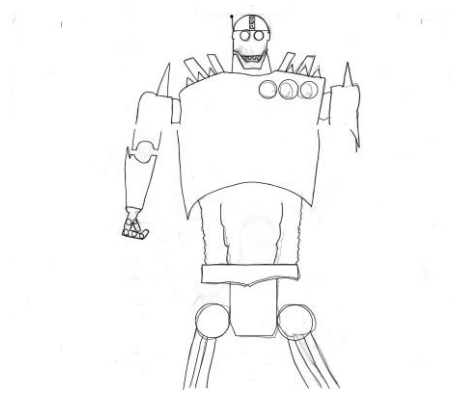

### 14. Heavy Walk

<https://youtu.be/yhMb7cBijrM>

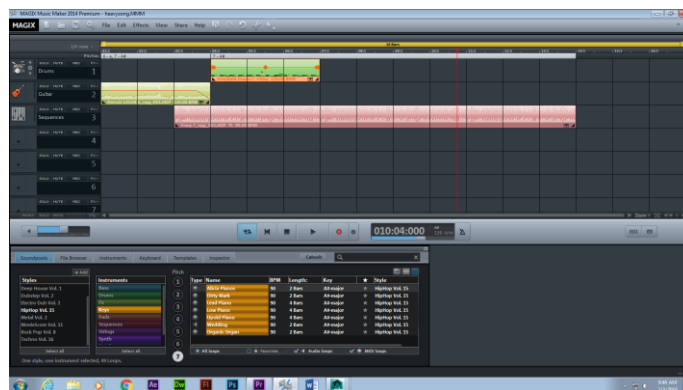

This is my animation of a character from a famous old game called Team Fortress. I took a character from a videogame that was really popular back then and made an animation where he is first walking, then dancing.

## 15. Game sketch

I created this image for a game designer who needed ideas.

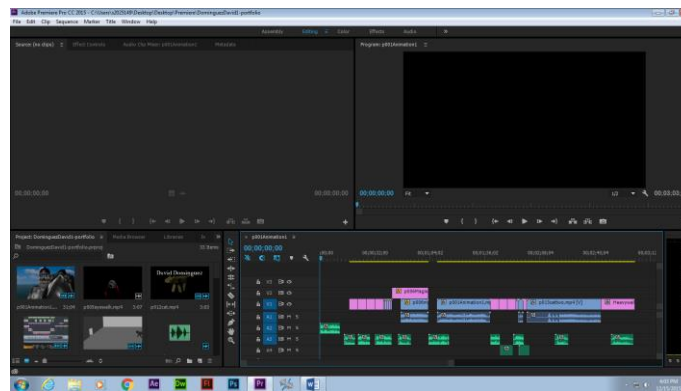

## 16. Heavy Song

I made this song for my Heavy animation.

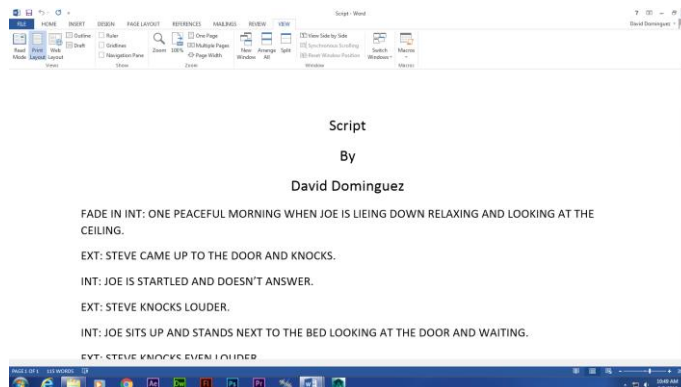

## 17. Demo reel

<https://youtu.be/JwVm515uBCQ>

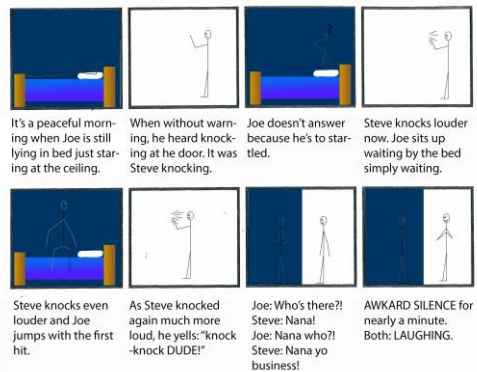

I used Premiere to make this demo reel of more projects.

## 18. Script

I created this script using professional formatting for my independent project.

## 19. Story Board

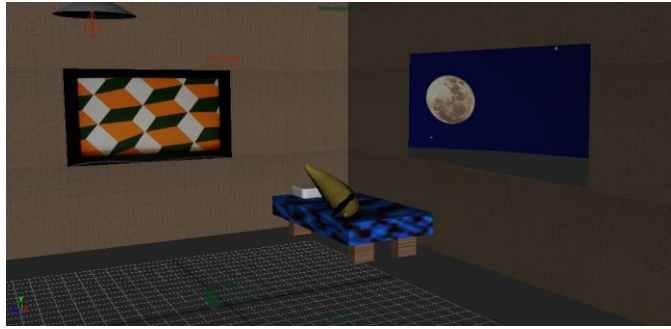

I used Photoshop and a storyboard template to create my independent project.

## 20. Indie Characters

I used Maya to create these characters for my Story Board.

## 21. Indie Background

I used this view for a picture of my background.

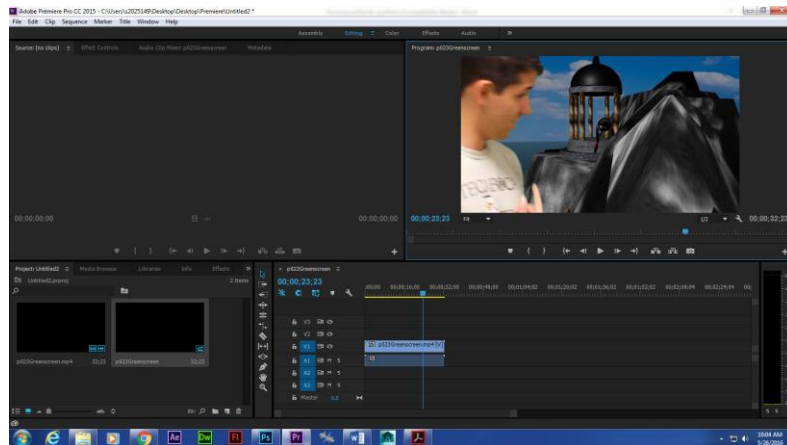

## 22. Indie Animation

<https://youtu.be/Os8P3GSjFHA>

My full Indie Animation, featuring voices: Me and Joe Broome.

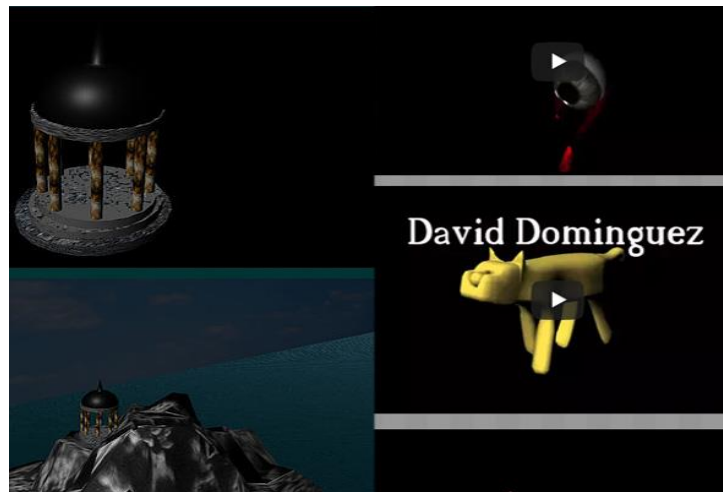

## 23. Green Screen

<https://youtu.be/1yi7ZjKdAk>

I put myself in front of a greens screen for this animation

## 24. Web Portfolio
