Bradley Barto

Portfolio

My name is Bradley Barto and I want to create something really cool and creative one day. I have dedicated most of my school classes to learning Digital Media, Graphic Design and Animation. I enjoy writing stories and imagining places and worlds that don't exist. I like to watch movies and play video games. I think that learning how to experience the things I love on a deeper level will make me happier and even more interested in it. So I have dedicated most of my life to learning more about things I enjoy and enjoying life as I want to. I am a very emotional person and people I care about are very close to me, like my family and my friends I love them all. All I ever want in my life is to live happy and stay close to the people I love, while still maintaining a vast knowledge about the things I enjoy.

1. Background Lesson One

I used Flash and a rectangle of two colors of blue in a gradient for the sky. I drew the clouds and made them one color of white. Then I used the brush to draw, Hills, Mountains, a River and Clouds.

2. Characters Lesson Two

I did research on both of the animals so their bodies looked realistic and then I colored them in to make them look colorful. Both of the animals are animated symbols so they can fly across the stage.

3. Animation Lesson One

I used key frames, motion tweens, animated symbols and a long, repetitive process of animating scenes and a team created story that was played out over separately over several scenes.
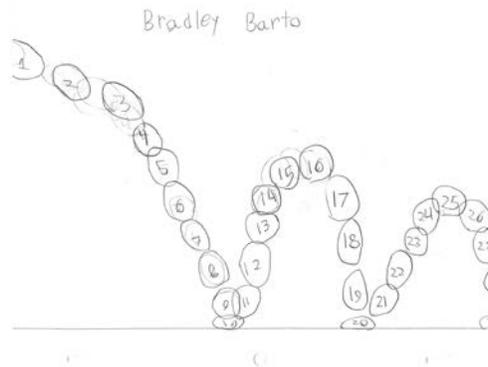

https://youtu.be/u8A6iynPJkc

4. MAGIX Music Studio

https://youtu.be/4XYzkCg0vLY

I used Magix to create music for my animations by my own beats created manually through the program or using loops provided by the software.

5. Hand Drawn Animation One

I used pencil and paper to draw all the circles in a sequence to make it look like a ball is bouncing and I sequenced each picture correctly after scanning it. I made a bouncing ball.
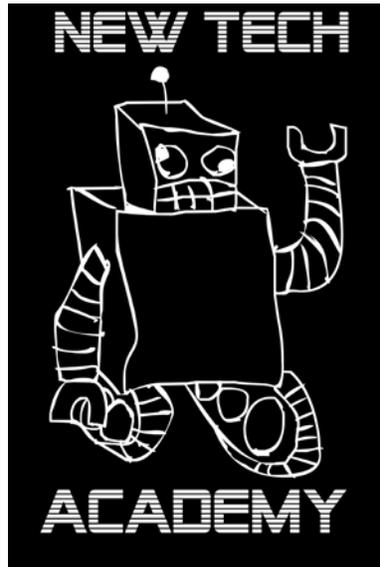

https://youtu.be/YRnA5KrpgjM

6. Animation Test 1

https://youtu.be/FcjCjAUC99Y

For the test. I made a two scene Animation in two class periods. We had to drawn everything and make it have story and certain things on the rubric and make it by our selves.

7. T-Shirt Design

I used a technology looking font and drew an old style cool looking robot.

8. Hand Drawn Drum Animation

https://youtu.be/iRPIlWiZI-k

I used pencil and paper to drawn a 15 frame animation of an arm moving to hit the drum multiple times. It was used for practice drawing hands and to demonstrate a flipping motion.

9. Script

The Plane Crash

By:

Bradley Barto

EXT:

A PLANE CRASHING IS HURTLING TOWARD THE GROUND AND THE ENGINE IS ON FIRE

The crowd panics and screams

INT: THE PASSENGERS ARE SCREAMING IN THEIR SEATS

The Pilot says over the intercom

                         Pilots:
                              It's okay every cloud has a silver lining.
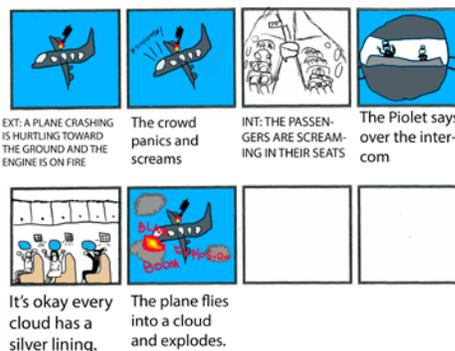

The plane flies into a cloud and explodes.

I used word the professional script formatting to create this short script.

10. Naviance

I used Naviance to document and select my classes for my Akins schedule choices.

11.Storyboard

I used Photoshop to plan put a script that I had previously written. The storyboard was several frames long and consisted of the script and the drawn pictures as well.
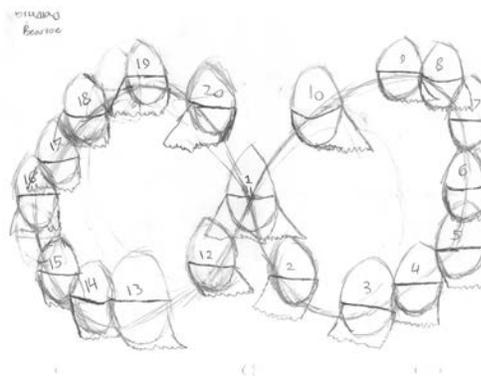

12. Zombie Animation

https://youtu.be/qNdthE2uJyY

I used Flash and Adobe Premier to edit and create this animation complete with sound effect loops and music. It was made for a Halloween YouTube project.
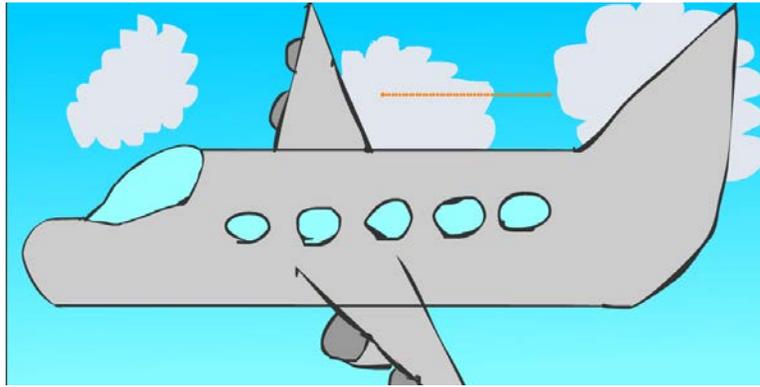

13. Egg Skirt Hand Drawn Animation

https://www.youtube.com/watch?v=4z_ACacf07w

I learned how to make a character move with clothing attached on a short hand drawn animation that was edited in Premiere.
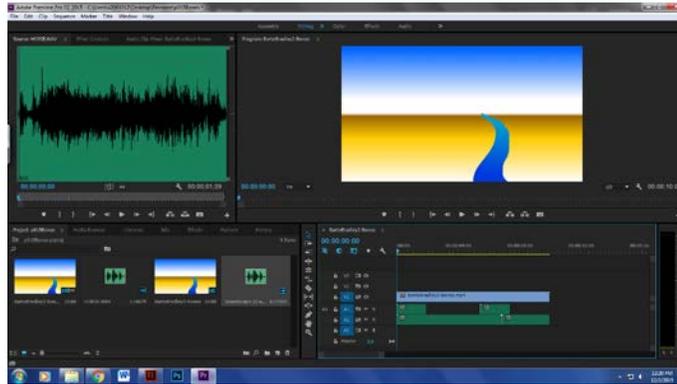

14.Storybook Background

I used Flash to make a background for my kid's story animation.

I used Flash to animate certain characters like Fire, Clouds and People for my kid's story animation.
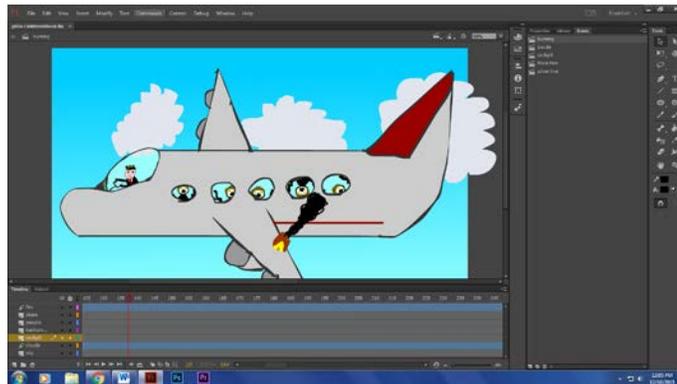

15. Bone Tool

I used Flash to Animate a short clip of a horse running. We then later used the Bone Tool to move parts of my character with Keyframes called a Pose.

16. Children's Book

I made a one minute long animation that I wrote a script for and then over the course of several days I animated it using Key Frames and Multiple Scenes to create the final product in the link above.

17. Game Design Animation

For this project we designed a character for a video game, I created an evil minion but did not finish. We hand drew the image then after scanning and redrawing it, we sent it to the game developer.

18. Demo Reel

https://youtu.be/UQNNq7jX7qs

We recorded audio of each item on this portfolio and then edited photos over the project on it.

19.Independent Script

Understanding

By:

Bradley Barto

EXT: IN A RAINY FOREST WITH A SMALL CREATURE AND A LARGE MAN

A small, lone little creature is being beaten by a tall man. The man kicks the creature away, it hits the ground and it runs away.

EXT: SOMEWHERE ELSE IN THE FOREST.

The creature runs up to a girl. He shows her the marks from the man. The girl looks around and gives a confused look. The creature nods in the direction of the man.

EXT: ON THE HILL THAT THE CREATURE WAS KICKED DOWN

The girl and the creature run back the other way. The creature and the girl run into the man and he stops. The man looks at them angrily. The man runs towards the girl and the creature, but they jump out of the way. The man slips and falls into the mud. He looks up towards them and they look back at him.

EXT: CLOSE UP ON THE MAN

The man stares with fury and rage.

EXT: CLOSE UP ON THE CREATURES EYES

The creature stares back with caring passionate eyes.

EXT: CLOSE UP ON THE MAN'S EYES AGAIN

They share a moment and the man's eyes go from angry, to an understanding of what he had done.

EXT: THE LAST SCENE IS THE THREE WALKING TOGETHER INTO THE SUNSET IN HARMONY.

I wrote this script between making other projects. It is for the independent animation.

20.Independent Storyboard

After writing the script, I planned out the animation on a story board, with pictures in each frame matching up to parts of the script.
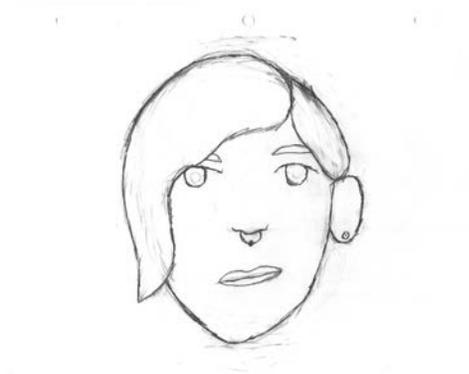

21.Independent Animation

https://youtu.be/QPV7Bk4ZDDk

An animation I made over the course of several weeks. With hand drawn characters an backgrounds, over 47 moving symbols and all independently made.

22. Double Take

https://youtu.be/J9MMIGlnD7k

I hand drew a person doing a double take by drawing multiple faces on 16 different sheets of paper.

23. Independent Animation Characters

I animated characters for my animation so that they could easily be animated into multiple different positions.

24. Independent Animation Backgrounds

I drew many backgrounds for all the different scenes in my animation for what happens in the story.

25. SLO Test 2

I had one class period to make a short movie trailer and this is what came out of it. I'm actually barely proud of it.

26. Certiport Test

I completed the certiport test for college credit and a certificate of becoming a certified adobe associate.

27. Online Portfolio

We created an online portfolio, using wix, in last views days of class, making this one and the information on it obsolete.
