Portfolio

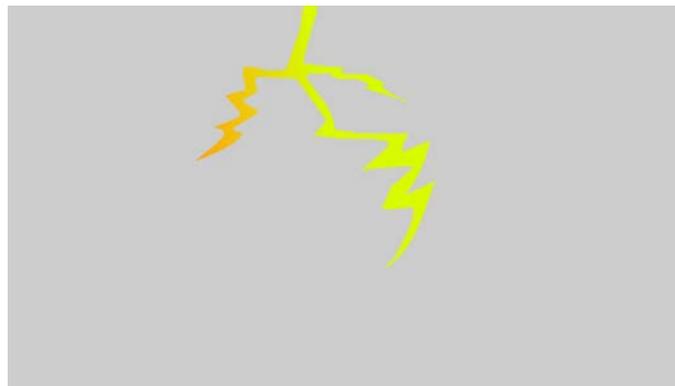

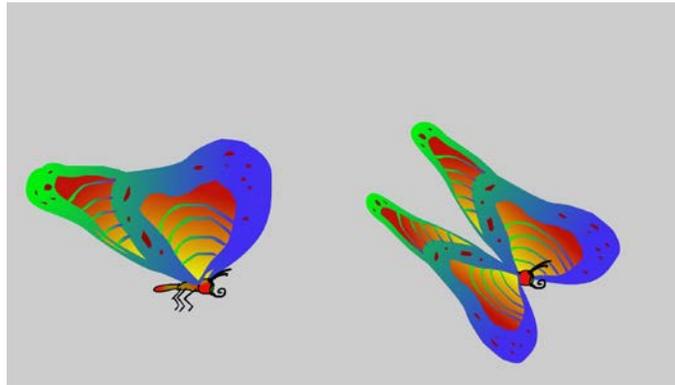

I am Nathan Benavides and I was born in Austin, TX. I attended Akins high school and was on the football team. I enjoy music, video games and sports. I don't know what I plan on being yet but I know I want to study computer programming and science; I am also an AVID student. I've traveled all around TX but not outside of TX, so for college I would like to leave TX.

1. Background Project One

I used flash to make this simple background. I used a gradient tool for my sky and my water and I used a brush for my mountains, clouds, and grass. I then animated it.

2. Project Two Characters

For the butterflies I used my brush tool to make patterns and I used the gradient tool to make the different color patterns. I used this technique on all of these characters. I researched examples of these characters

3. First Flash Animation

I used the timeline, motion tweens, frames and key frames to make a short animation that we worked on in class. The butterfly was an animation re-used and I also used a motion preset for the smoke
