Portfolio

My name is Hannah Finch. I was born in Austin, TX but grew up in Fredericksburg, TX. I also plan on being a graphic designer. I went to Akins High school. I enjoy art, 3d modeling, sculpting, creating advertisements, writing and making children's books for my younger siblings. I have experience in Flash, Photoshop and 3d modeling such as, Blender and unity. I hope to learn as much as I can from these set of classes.

1. Background One Project

I used Flash to create this simple background for my first project in Animation class. I used a rectangle tool with a gradient for the sky and then outlined my clouds and filled them. I drew mountain shapes and had to close every shape to fill it with a color. I did the same for the hills and the water.

2. Project Two Characters

I used Flash to make these three characters. I simply made an outline of each one with the brush tool. Then filled my outlines, with my desired color, with the paint bucket tool.

3. First Flash Animation

I used the timeline, motion tweens, frames and key frames to create a short animation that we worked on as a class. The butterfly was a repeated animation in the library and I also used a motion preset for the smoke.
