Portfolio

I'm Andrew Hudspeth and I went to Akins high school. I am from Austin TX; I have 4 brothers, 2 step and 1 step sister. My future is still a mystery because I don't know what I want to do but I do have some interests. I would like to do business or video game design. I would like to go to UT for college because it is close to home. I am a hard worker when it comes to school work and when it's something I want to do

1. Background one Project

I used flash to make this background for my first animation project. I used a rectangle tool and gradient for the sky and then outlined my clouds and filled them. I drew mountain shapes and filled them with color. I did the same for the hills and the river.

2. Project two characters

I did research to find good looking butterflies and copied the one I liked loosely. I also looked at images of explosions to create mine but I made up the lightning on my own.

6. Animation test

<https://youtu.be/c-qk2T4ZB9s>

I made this animation on my own using written instructions. I included objects, animated symbols and items using the elements and principles of design

7. T-shirt contest

We made the new tech design with flash

8. Drum animation

<https://youtu.be/MS8Pv-ur-sl>

We drew a hand in different sequences with a drumstick hitting the drum within the sequence.
