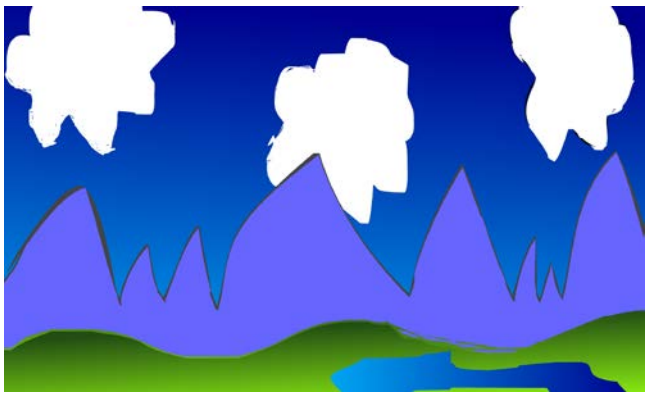
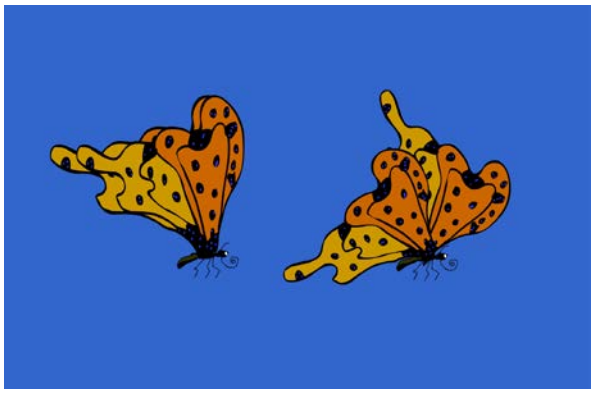
I'm Zack Segura, and I'm a student at Akins High School in Austin, Texas. I attended James Bowie High School my freshman year of high school. This is my sophomore year of high school at Akins High and it has been great. I would consider myself a people person; I enjoy surrounding myself with friends and family, and would overall want to pursue a technological career.

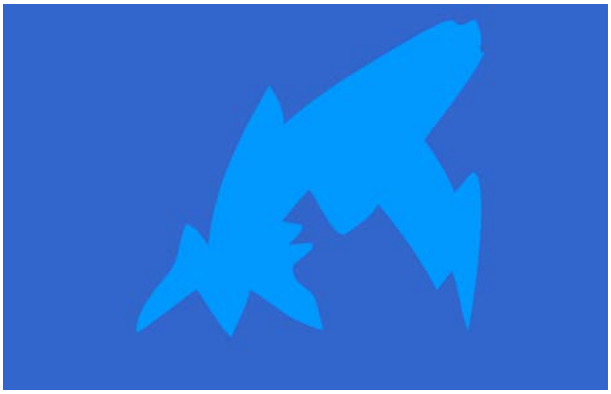
1. Background One Project



I used flash to create this simple background for my first project in animation class. I used a rectangle tool with a gradient for the sky and then outlined my clouds and filled them. I drew mountain shapes and had to close every shape to fill it with a color. I did the same for the hills and for the water.

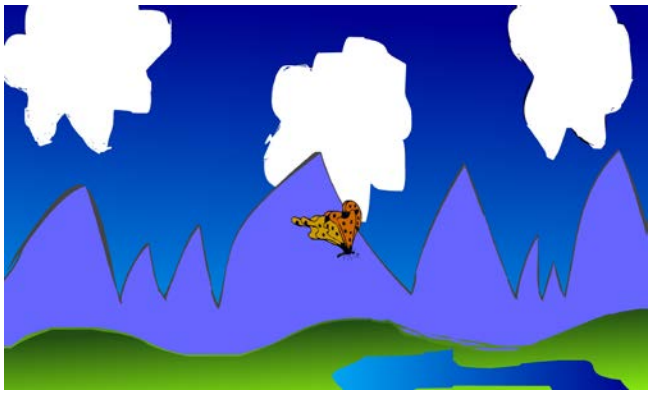
2. Project Two Characters





On all of these drawing I used the brush tool, and paint bucket tool. I used the brush tool the draw the pictures, closed them, and then used the paint bucket on them to fill them with color. I did research to find good looking butterflies, and explosions, and lightning.

3. First Flash Animation



https://youtu.be/AJO0qHUPUb4

I used the timeline, motion tweens, frames and key frames to create a short animation that we worked on as a class. The butterfly was a repeated animation in the library, and I also used a motion preset for the smoke.

4. Magix Music Studio

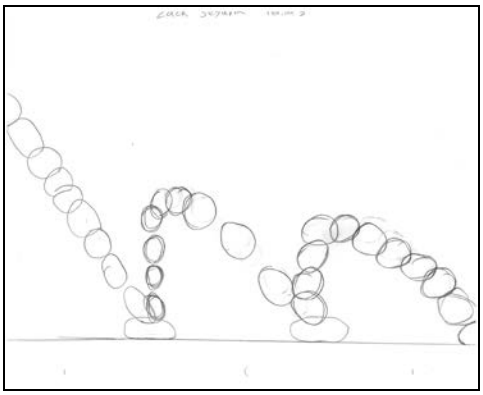
I'm using magix to create music for my animations.

5. Hand Drawn Ball Bounce Animation



https://youtu.be/2YiNw3ddYss

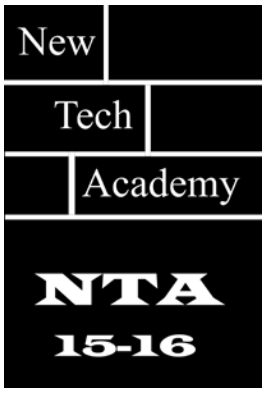
This is a short hand drawn image where I drew 30 balls on one page. Then I got 30 more pieces of paper and copied 1 ball on each page in order. On the left is an animated gif of the balls moving in sequence. On the right is all the balls I had to hand-draw on one page.

6. Animation Test 1

https://youtu.be/a_7OqDgl82A

I had to make this animation on my own using written instructions. A boy shoots a basketball and then a UFO comes out of nowhere and takes the ball. Then it shortly returns the ball.

7. T-Shirt Contest



I used flash to create this design. For a t-shirt contest at school, I used the text tool, and rectangle tool.

8. Drum animation

I drew this animation to practice a flip motion with more than one timing and spacing speeds.

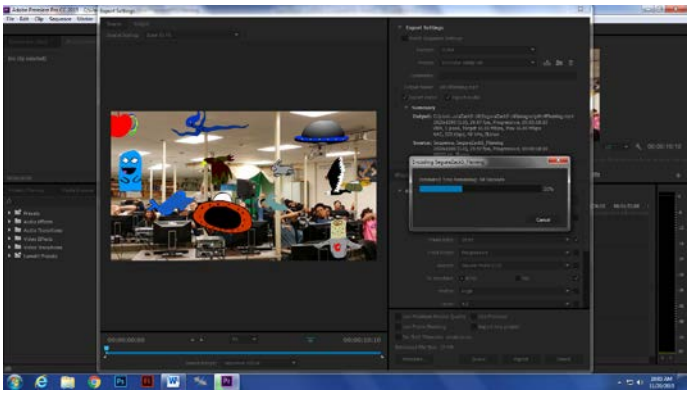
https://youtu.be/dAiT8mqN8iE

I handdrew the eggs and placed them around the lines that I also provided. I then added skirts to the bottom of them hence the name eggskirt, then copied each one onto a single piece of paper. I scanned the photos, put them on my computer, and used adobe premier, and its various tools to make the animation.

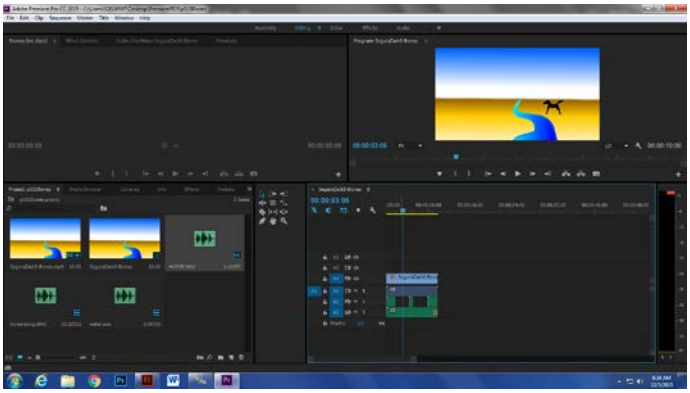
14. Fleming Video



https://youtu.be/UR8aWN0ZBbI

I used color keying to create this animation, including a video with all of my classmates and their drawn characrters. It was a crazy fun project and I got to share it with my classsmates.

15. Flash Bones and Motion Presets



https://youtu.be/W-GoPjOcIUI

I used the bone tool and one of the motion presets in Flash to create this short animation of a horse crossing a river.

16. Children's Book Animation

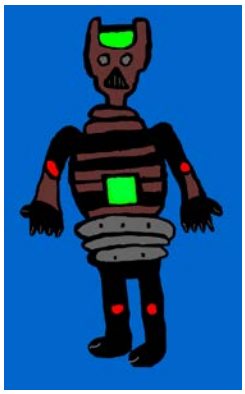
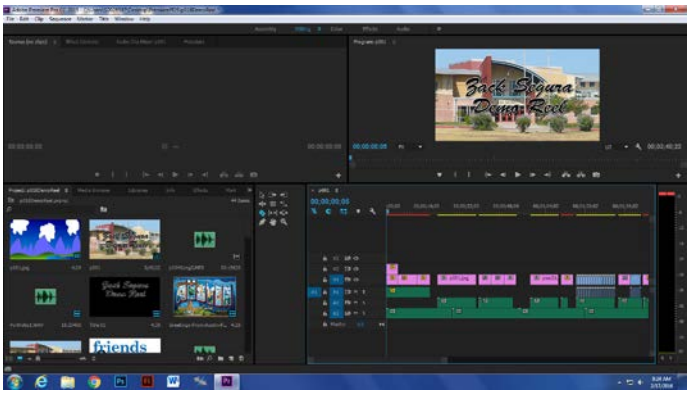
I created a hand drawn storyboard to guide me through this animation, I went into flash and drew the storyboard into different scenes.

17. Game Sketch for developer



I used a hand drawn image I made, scanned it into a computer, and then cleaned it up in flash and added color to create this image.

18. Demo Reel



https://youtu.be/y7YgIOmgLYk

I went on Adobe Premiere and started to put my portfolio on there in the form of a video. I used magix music maker to record each caption in the portfolio.
