I'm a really fun and creative person. I want to go to UT to study something that will lead me to success. I chose this class to have to have fun and because I love animations and videogames. I play console (Xbox One) and PC games. One day I want to make a successful game.

1.BACKGROUND 1

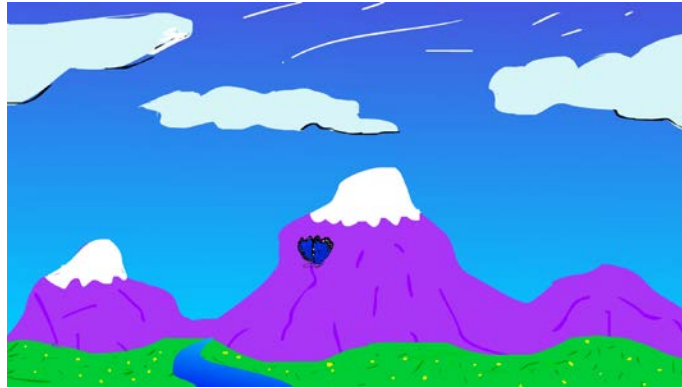

I used flash to create this simple background for my first project in animation class. I used the rectangle tool with a gradient with the sky and water and outlined my clouds and filled them. I also drew mountains and had to close every shape to fill them with the color. I did the same with the hills and the river.

2.PROJECT 2 CHARECTERS

I made this in flash using the paint brush and filling them with gradients. I researched images that I like and recreated them at flash.

3.FIRST FLASH ANIMATION

I used the timeline motion tweens frames and key frames to create a short animation that we worked on as a class. The butterfly was a repeated animation. And I also used the motion preset for the smoke.

5.HAND DRAWN BALL BOUNCE ANIMATION

I used pencil and paper to draw 30 circles in a sequence which created the illusion of bouncing with timing and spacing. https://youtu.be/a_AhJr4X6AY

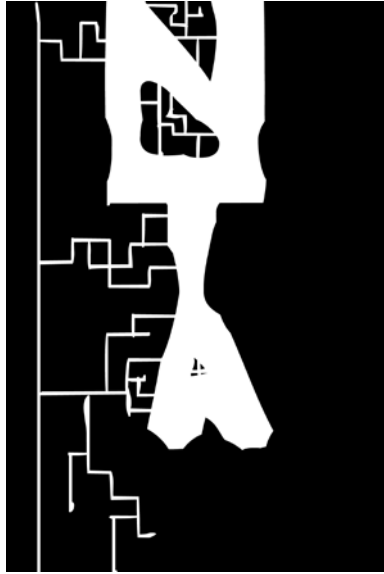

6.Animation Test

<https://youtu.be/4LKKmu-2gpo>

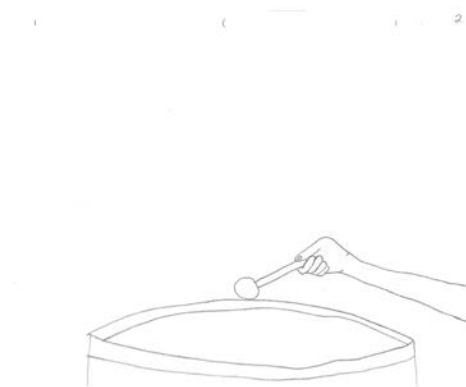

I had to make this animation on my own using written instructions. I included transparent objects, and more.

7.T-shirt Contest

I made this using flash and used the shift key to make the straight lines

8.Drum

I made this using a pencil and paper. <https://youtu.be/dzHBmegb2pM>
